

Building the Family of Our Father In Heaven

Archibald F. Bennett

Secretary, Genealogical Society of Utah

Almost 60 years ago, saw a time when:

“A universal system of intelligent cooperation will bring together on one record sheet every fact in existence regarding a particular family. This wealth of data will insure accuracy and banish error. Expensive and time-consuming duplications in research and repetitions in ordinances will be eliminated. No sooner will a new fact be uncovered in any part of the world by a researcher than it will be communicated to the Archives center and be assigned to its proper place, on some family record.”
